NIGHT STICK PRO
Life Depends on Light™

NEW FOR 2010

Patrol Duty with Strobe

Designed specifically for public safety and military professionals. The NSR-9912 and 9914 raise the bar of professional flashlight performance by offering one of the brightest flashlight beams in its class. The NSR-9912 and 9914 incorporate the Bayco exclusive *Dual-Light INNOVATION* that combines a super bright floodlight and a sharply focused flashlight beam, all in a compact package.

Non-slip diamond grip

Sharp focus 220 lumens flashlight

Broad-beam 180 lumens floodlight

NSR-9912
Single body switch control with momentary operation

NSR-9914
Body & Tail switch control with momentary operation

› 220 lumens flashlight
› 180 lumens floodlight
› 230 total lumens in Dual-Light mode
› Flashlight • Floodlight • Dual-Light
› Momentary flashlight operation
› Anti-roll Tri-Lobal design
› Bright LEDs - 50,000 hour life
› Impact / chemical resistant Xenoy® housing
› Non-slip diamond grip
› Rechargeable NiMH battery pack - maximum charge every time with no memory effect
› Three hour charge time
› Lithium CR123 battery carrier for emergency back-up power (batteries not included)
› Waterproof to 1 meter (IP67)
› Length: 9.2 inches (233 mm) • Weight: 14.0 oz (397g) Body diameter 1.3 inches (33 mm)

INCLUDED
Charging platform
100-240 V AC and 12V DC charging adapters
Three cell CR123 Lithium battery carrier
Lifetime Warranty*
Meets European Community Directives CE

Life Depends on Light™
PRO®

Flashlight
SHARP FOCUSED BEAM
❯ Powerful light output
❯ Maximum throw

Floodlight
FOUR TIMES BROADER THAN THE FLASHLIGHT BEAM
❯ Sweep a crime scene for evidence
❯ Search for contraband
❯ Read a VIN

Dual-Light
EXPAND YOUR FIELD OF VISION
❯ Activate both for maximum officer safety

Long Throw

Dual-Light

DUAL-LIGHT INNOVATION

For over 85 years flashlight functionality has not changed very much. Sizes and shapes have changed, but not the way a flashlight is used. Flashlights have always been used to spot objects at a distance… a task that most flashlights perform well. Flashlights are also used to illuminate objects at close range…something that conventional flashlights do not do well.

Until NIGHTSTICK, law enforcement and military professionals had few options.

FLASHLIGHT • Integrated Optical System for Long Throw Focused Center Beam
NIGHTSTICK incorporates a deep parabolic reflector to capture and shape 99.5% of the light from the latest technology high-output LED. Maximum light output and run-time are optimized by the microprocessor.

FLOODLIGHT • The Best Lighting Solution for Evidence Search - Crime Scene Investigation - Expanded Safety Area
Combining a separate floodlight with a flashlight into a single housing, is NIGHT-STICK *Dual-Light INNOVATION*. The floodlight spreads the light over an area four times broader than the flashlight beam with no hot spots that impair visibility while searching a crime or accident scene.

Only NIGHTSTICK Offers Flashlight • Floodlight • Dual-light Capability
All NIGHTSTICK dual-lights employ a bright, sharply focused flashlight beam for maximum throw and a floodlight for close-up work. Activate both for the ultimate in officer safety and utility… only NIGHTSTICK has dual-light capability.
